PM-1268 - Canada

Dear John:

I have your letter of March 2, 1992, and am writing to notify you that the only development in the U.S. case since the March 19, 1991 amendment is the citation of the Newton reference (which you already have a copy of). We are filing a response today to the Examiner's Action citing that reference. A copy of that response is being mailed to you under separate cover.

I do not have a copy of the claims pending in Canada. But, assuming the claims are the same as were filed in Europe and Australia, we do not recommend amendment of the claims at this time. When convenient, please send me a copy of the pending claims in Canada.

Very truly yours,

Ronald A. Sarbanow
